Support Your Microsoft Dynamics 365 F&O

Microsoft Dynamics 365 support requires a proactive team of expert professionals to ensure continuing success. Domain 6 global Proactive Technology Services provide the assurance to maintain your Dynamics 365 system operating at peak performance. We work proactively with your team to avoid disruption to daily business operations. Our team will be constantly monitoring and analyzing your production, reporting environments, enabling telemetry on different users and helping to reduce resource bottlenecks.

We reduce the cost of maintaining Dynamics 365 and let your team focus on configuring and enabling other features or functions that your business requires. Our team will recommend the proper fixes and patches, communicate with you on potential disruption from Microsoft and help with activities to support performance enhancements.

Our global team of Dynamics 365 experts deliver a unique transformational service to get the most out of your Dynamics investment.

Our History

A team of industry experts and technology savvy professionals founded Domain 6 to become one of the leading global Dynamics 365 services providers. After extensive experience in multinational organizations such as Microsoft, CGI, PwC, and other systems integrators and independent software vendors, these leaders came together to fulfill a dream of enabling real estate firms with technology.

About Us

OUR MISSION

Empower real estate firms to enhance customer experiences with innovative technologies.

OUR VISION

Deliver business and transformational solutions for real estate organizations using Microsoft technologies worldwide.

OUR CULTURE

With our mission and vision in mind, we want to build a team of technology and industry experts that support clients' success. Our culture focuses on three major pillars: service excellence, innovation, and industry expertise.
