

Property Lease Management is a directly embedded solution for Dynamics 365 for Finance and Operations. It gathers the tools needed to manage your business properties while enabling compliance with the recent accounting changes. Property Lease Management simplifies the management of multiple leases and subleases, and streamlines complex contracts by employing innovative lease-creation wizards to eliminate the potential for human error and repetitive tasks.

Aside from lease processing and administration, Property Lease Management also excels at building detailed real-time reports that help organizations improve their analysis and forecasting leading to better business decisions.

The Property Lease Management advantage

Digitalize your lease portfolio for all property, plants, and equipment

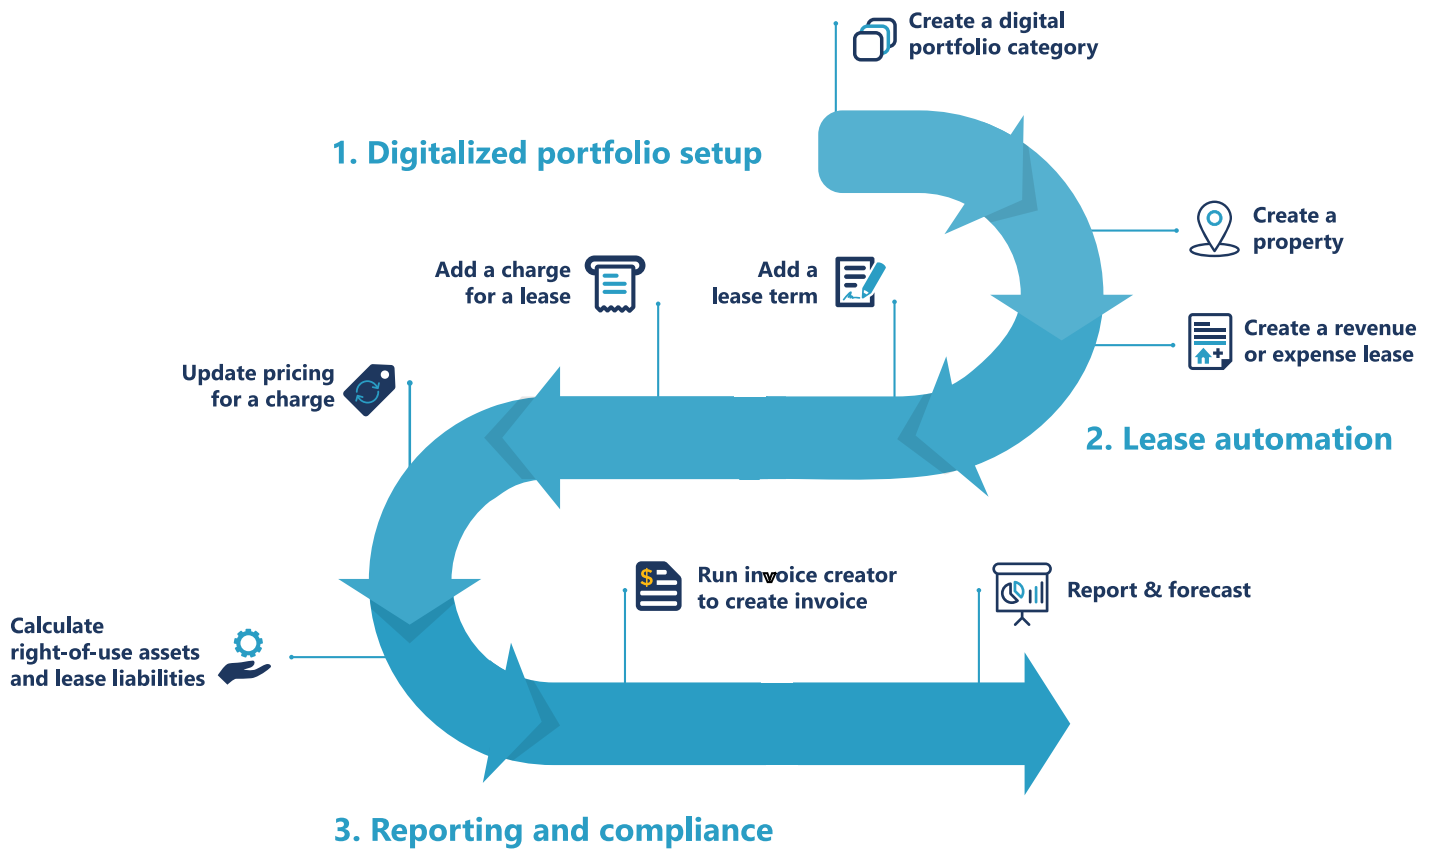

Report on multiple levels of lease and sub-lease cashflows in real time

Facilitate your organization's compliance with ASC 842 and IFRS 16

Automate your end-to-end lease and charge management process

Discover the better way to manage and report on PP&E leases

- Digitalize your lease portfolio and manage multiple levels of revenue and expense leases customized to suit your unique business model
- Facilitate your organization's compliance with ASC 842 and IFRS 16 whether you are a lessee or lessor
- Streamline complex rate schedules, renewal terms, and charges with intuitive wizards
- Gain real-time insights across your entire lease portfolio using detailed property analysis, vacancy, rent roll, and lease summary reports
