

5 Signs It's Time to Migrate from GP to Dynamics 365

1

Your scalability is limited

Your business has outgrown the capabilities of GP, such as limited number of users, transactions or amount of data you can handle.

2

Compliance is an issue

Your business operates in a highly regulated industry, such as healthcare or finance, and GP doesn't meet the necessary compliance requirements.

3

You are lacking functionality

Your GP is missing mobile accessibility, integrations with other systems you need or advanced reporting.

4

Maintenance costs are adding up

Your costs, amount of time and resources you spend on maintaining your GP solution are no longer acceptable.

5

Your solutions is obsolete

The latest technology and automatic updates, the most advanced cybersecurity practices enabled - you are missing out.
